Day 3

Real Talk With Robots

Learning Objective

To empathise and define what a community is to plan for a chatbot project.

Warm-Up

What does it mean to empathize with others? Draw, write, or sketch your answer.
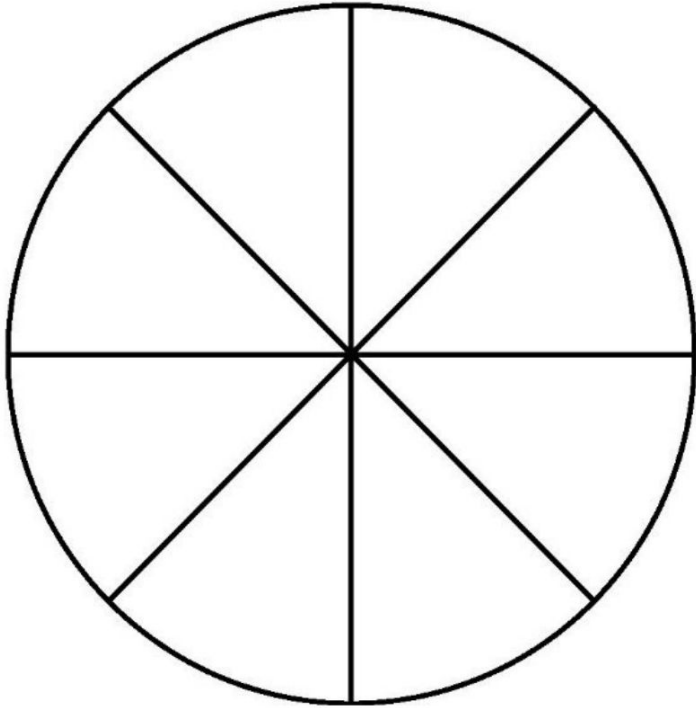

What is community? Draw, write, or sketch your answer.

5:00

Empathize

We are using what we know about ourselves to begin to better understand other people to belong to our communities.
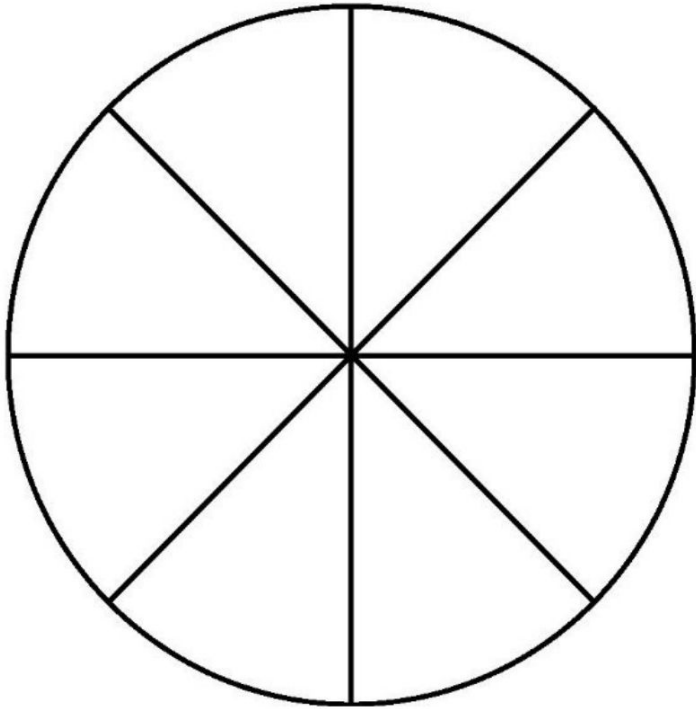

Identity

Fill in each section of the wheel with an identity of yours.

Examples:

- Home country
- Gender
- Languages spoken

Identity

Put a **red dot** in the areas that you think about most often in your everyday life.

Put a **yellow dot** in the areas you don't think of often in your everyday life.

Put a **green dot** in the areas that have the biggest impact on how you view yourself.

Put a **blue dot** in the areas that have the biggest impact on how others perceive you.

Values

Choose three identities. For each one you select, write three values that you have because you have that identity.
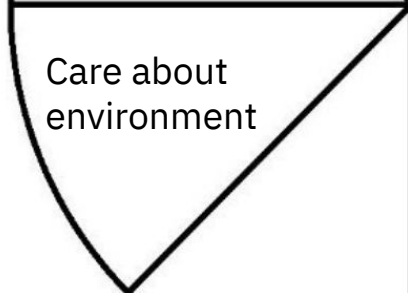

Care about environment

I value:

- Recycling
- Walking/ taking the bus
- Buying local food

Identifying my community

For each identity we have, we belong to a community of people who have similar identities.

My identity:

My community:

Care about environment

Environmentalists

For each identity you selected, describe what community you belong to.

My community's values

The values we have because of our identities are also probably held by other members of our communities.

My values:
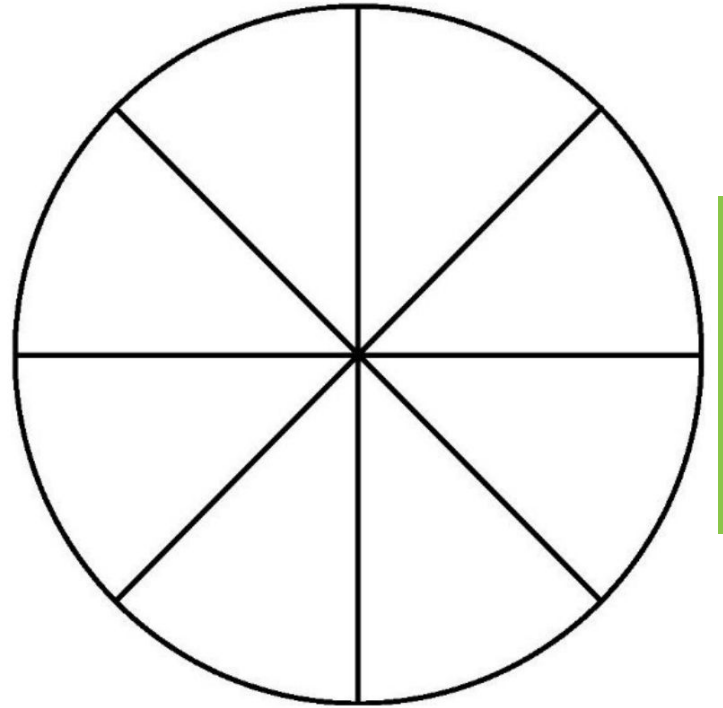

- Recycling
- Walking/ taking the bus
- Buying local food

My community's values:

- Reduce/reuse/recycle
- Using sustainable forms of transportation
- Decreasing our carbon footprint

We are building chatbots to inform, persuade, or entertain members of our community.

Let's recap

Example Project

In your workbook complete the following

Things I notice are...

Things I wonder are...

Project Statement

In your workbook, complete a project statement that defines the project you would like to create.

For my project, I will be making a chatbot that will ENTERTAIN / INFORM / PERSUADE members of my community, which I define as:

I will know my project is successful if it...
